## SUMMARY

Frontend engineer with **7+ years** building data-heavy B2B products in fintech, healthtech, and HR tech, with a focus on testing, accessibility (WCAG), and performance. At ScaleXP, owns features end to end across React and Python/Django for a reporting platform used by **1,200+ companies**, from onboarding and dashboards to accounting integrations and Stripe billing.

## TECHNICAL SKILLS

**Core:** TypeScript, JavaScript, React, Redux, Next.js, Styled Components, HTML5, CSS3

**Testing & Quality:** Jest, React Testing Library, Playwright, Cypress, Storybook, BrowserStack, Sentry

**Also Experienced With:** Python, Django, PHP, Symfony, Vue.js, React Native, Firebase, Docker, Git

**Integrations:** Stripe, Xero, QuickBooks, Zoho Books, Salesforce, HubSpot

**Tools & AI:** Jira, Figma, PostHog, Claude Code, Cursor, CodeRabbit

**Practices:** Accessibility (WCAG), performance optimization, responsive design, cross-browser compatibility, Agile/Scrum

## PROFESSIONAL EXPERIENCE

### Frontend Developer

Sep 2022 - Present

#### ScaleXP

London, UK (Remote)

*London fintech SaaS automating financial reporting and analytics*

- **Replaced manual customer onboarding with a self-serve flow** by building the process for creating an organization, importing accounting data, and setting it up, work the team previously did by hand.
- **Kept financial dashboards fast as data grew** by building and maintaining them, including migrating their charts from legacy amCharts 4, which struggled with large datasets, to amCharts 5.
- **Let customers subscribe and upgrade plans on their own** by building the full Stripe subscription flow, so upgrades no longer require contacting the team.
- **Flagged UX, accessibility, and code issues early** by reviewing designs with the design team for usability, WCAG compliance, and technical feasibility, and reviewing teammates' pull requests.
- **Caught regressions before they reached customers** by adding unit, functional, and E2E tests (Jest, React Testing Library, Playwright) to core flows, backed by Meticulous visual checks, AI PR review, and Sentry monitoring.
- **Opened the platform to Zoho Books users** by designing and building a Python/Django importer that pulls their complete accounting data into ScaleXP, which had no Zoho integration before.
- **Cut manual reporting work by 30%** by automating workflows between Salesforce/HubSpot and Xero/QuickBooks, and hardening these integrations against third-party API changes that used to break syncs.

**Tech stack:** TypeScript, React, Redux, Styled Components, amCharts 5, Python, Django, Jest, React Testing Library, Playwright, Docker, GitHub

### Software Engineer

Jan 2021 - Mar 2022

#### Cleverzone

Algiers, Algeria

*Software company building its own products and client platforms, including healthtech and research apps*

- **Moved bookings and medical records online for 15+ clinics and 3,000+ patients** by building Docta, a WCAG-accessible telemedicine app (React, TypeScript, Redux) replacing phone booking and scattered records.
- **Linked researchers directly to investors** by building the Next.js frontend of EENAR, an accessible social research network.
- **Reduced production bugs by 40%** by introducing unit, component, and E2E testing (Jest, React Testing Library, Cypress) and Storybook into the team's release process.

**Tech stack:** TypeScript, React, Next.js, Redux, Styled Components, Jest, React Testing Library, Storybook, Cypress, Docker, GitHub

### Full Stack Developer (Web & Mobile)

Nov 2018 - Oct 2020

#### EmploiPartner

Algiers, Algeria

*Algerian e-recruitment platform*

- **Reached 5,000+ downloads** with Khadmni, a React Native and Firebase app built specifically for hospitality hiring, a sector poorly served by generic job boards.
- **Automated invoicing and lead tracking for 30+ client businesses** by taking the Builleo CRM (Symfony, MySQL) from concept to deployment, replacing manual tracking.
- **Cut page load times by 35%** by migrating slow legacy jQuery pages to React and Redux.

**Tech stack:** PHP, Symfony, MySQL, jQuery, React, Redux, React Native, Firebase, Bootstrap, Jest, Docker, GitLab

## EDUCATION

Bachelor's Degree in Information Systems and Software Engineering, University of Algiers 1

2015 - 2018

## LANGUAGES

Arabic: Native | French: Fluent | English: Fluent
